

# Meeting Your Needs

As a valued fellow Chamber member, I would like you to consider the Geneva Group for your on-going and future software development and maintenance requirements.

Since 1987, the Geneva Group has provided specialized knowledge and skills to help large and small businesses more profitable by making the most out of information technology. We can deliver a custom solution in a timely and cost-effective fashion that will meet your budget, schedule and functional requirements.

Our services include:

- Custom software development
- Custom database development
- Enhancements to your existing software
- Maintenance programming and on-going support
- Take over and complete existing projects
- Custom report development
- Project management
- Web site development and hosting services
- Networking support services

We can provide your business with first-class quality and dependable service for your on-going technology needs. We are committed to making your project a success.

Contact us today at (877) 448-4600 to schedule a no-obligation meeting to review your current and upcoming software development and/or maintenance requirements.
